

Steps to create Twitter App

1. Go to <https://developer.twitter.com/en/apps>
2. Click on "Create an app"

3. You might need to fill a questioner, if you are a first-time app creator, which will be approved by the twitter team.
4. Post approval, you can see the below screen. Fill all these details, depends on your project requirements.

The image shows the 'Create an app' form in the Twitter Developer Portal. On the left, there's a sidebar with the title 'Understanding apps' and four expandable sections: 'What is an app?', 'Why register an app?', and 'Which products require an API key?'. The main content area is titled 'App details' and contains the following fields:

- App name (required)**: A text input field with the placeholder 'SampleAPIName'. To the right, it says 'Maximum characters: 32'.
- Application description (required)**: A text area with the placeholder 'Give your short description of your app usage.' Below the text area, there's a tooltip that says 'Website URL will be used to source attribution for Tweets created by your app and will appear in user-facing authorization screens.' To the right of the text area, it says 'Between 10 and 200 characters'.
- Website URL (required)**: A text input field with the placeholder 'https://twitter.com/'.
